 Cough Sneezing Vomiting Diarrhea Parvo Other _____

**Dogs must be in good health to receive vaccinations; those dogs with health concerns may not be vaccinated and should be seen by a full service veterinary clinic. There are a small percentage of dogs that will have an allergic reaction to vaccinations. Please advise the veterinarian if your dog has had a previous allergic reaction to vaccines. Symptoms of a reaction may include facial swelling, swollen ears, muzzle or eyelids and/or rubbing of the face.*

I understand that vaccinations may cause adverse reactions in some animals. I hereby release petsalive Spay/Neuter Clinic, the veterinarians, veterinary assistants, and all of its officers, directors, employees, and members of its staff from any and all claims arising out of, or connected with, giving these vaccinations.
